Subject: Lahaina injection wells

Dear Nancy Rumrill,

I am writing today at a resident of Maui to urge you to make the requirements even more strict for the injection well in Lahaina. I am not a marine biologist, just a reef hugger. I know that the nutrients released are causing obvious damage to our dying and struggling reefs. It seems the least we can do (if not completely revamp the whole system) is the make the treated water released the least harmful we can.

Mahalo for your time,

Mary Jordan
